

Dr Annie Arvind

Paediatric cardiology · Foetal echo

CLINICIAN PROFILE

PAEDIATRIC CARDIOLOGY · CONGENITAL · FOETAL ECHO

Dr Annie Arvind

MBBS, MD (Paediatrics), DNB (Paediatric Cardiology)

Consultant, Paediatric and Adult Congenital Cardiology

Families come because a child's heart did not form as it should, because an echo before birth has raised a question, or because an adult is still living with a congenital defect. Dr Annie Arvind trained in paediatrics at Government Medical College, Jammu, and in paediatric cardiology at Apollo Hospitals, Chennai. She was Associate Consultant at Artemis Hospital, Gurugram, and now works the paediatric and adult congenital list at SMSIMSR — imaging first, a catheter when a catheter will do, theatre next door when it will not.

Consultant, Paediatric Cardiology

Sri Madhusudan Sai Institute of Medical Sciences and Research

Sathya Sai Grama, Muddenahalli — 30 minutes from Bangalore International Airport

See the heart before you open the chest.

She is Consultant in Paediatric Cardiology at SMSIMSR. The work is congenital heart disease in children and in adults, foetal echocardiography, cardiac imaging, and congenital catheter interventions. Cardiac surgery sits on the same campus. Outreach screening camps are part of the habit, not an extra.

What he sees patients for

International families most often come after an echo has shown a hole, a narrowing or a complex defect — or because an adult still lives with a heart that was never fully corrected. Cardiac surgery and intensive care sit on the same campus.

Congenital heart disease	ASD, VSD, PDA, tetralogy of Fallot and the rest of the congenital list — in children and in adults who have grown up with a defect
Foetal echocardiography	Looking at the heart before birth. Pursuing the PCSI fellowship in foetal echo
Cardiac imaging	Echo and imaging that decide whether a child needs a catheter, an operation, or watchful waiting
Cath interventions	Congenital cardiac catheter interventions when a wire can do what an open chest used to do
Rhythm in children	Paediatric arrhythmias and acquired heart disease in children, planned with the surgical team next door

Why families can feel steady in his care

► Trained for children's hearts

MBBS and MD Paediatrics, Government Medical College, Jammu. Senior Resident, Guru Teg Bahadur Hospital, Delhi. DNB Paediatric Cardiology, Apollo Hospitals, Chennai. Associate Consultant, Artemis Hospital, Gurugram.

► Recognised for the thesis and the clinic

AV Gandhi SCAI Best Thesis Award — first runner-up, 2020. Dr APJ Abdul Kalam Health Award, 2023. International Best Researcher Award for research and excellence in paediatrics, IIRAC 2023.

► Societies that keep the standard

Life member, Indian Academy of Paediatrics. Life member, Paediatric Cardiology Society of India. Pursuing the PCSI fellowship in foetal echocardiography.

Credentials

Present appointment	Consultant, Paediatric Cardiology Sri Madhusudan Sai Institute of Medical Sciences and Research (SMSIMSR), Sathya Sai Grama, Muddenahalli
----------------------------	--

Qualifications	MBBS — Government Medical College, Jammu MD Paediatrics — Government Medical College, Jammu DNB Paediatric Cardiology — Apollo Hospitals, Chennai PCSI Fellowship in Foetal Echocardiography — in progress
Earlier posts	Senior Resident, Paediatrics — Guru Teg Bahadur Hospital, Delhi DNB training — Apollo Hospitals, Chennai Associate Consultant — Artemis Hospital, Gurugram
Practice	Paediatric and adult congenital cardiology Foetal echocardiography and cardiac imaging Congenital cardiac catheter interventions Structural heart disease · Paediatric arrhythmias
Recognition	AV Gandhi SCAI Best Thesis Award — first runner-up, 2020 Dr APJ Abdul Kalam Health Award, 2023 International Best Researcher Award — IIRAC 2023
Memberships	Life member, Indian Academy of Paediatrics (IAP) Life member, Paediatric Cardiology Society of India (PCSI)

A short note on coming to clinic

Bring recent echocardiograms, discharge summaries and a plain account of feeding, breathlessness, blue spells or what the child can no longer do. The first visit is an assessment and a written plan — not an automatic date for the cath lab or theatre. This note is to help you choose a cardiologist. It is not a substitute for a consultation.
